1.0 Overview:
MycoApply® Endo/Ecto is a granular mycorrhizal inoculum consisting of 4 species of endomycorrhizal fungi and 7 species of ectomycorrhizal fungi. About 95% of the world's plant species form symbiotic relationships with at least one of these types of symbiotic soil fungus. These beneficial fungi greatly increase the effective rooting area of plants, thereby enhancing plant growth, vigor, and tolerance of environmental extremes. MycoApply® Endo/Ecto is a granular material containing mycorrhizal propagules, which colonize roots and extend into the surrounding soil forming an essential link between plants and soil resources. Increasing the rooting area allows improved access to water and nutrients, promoting plant quality and crop performance.

2.0 Application Instructions:
MycoApply® Endo/Ecto is a granular mycorrhizal inoculant that can be banded under seed, worked into seedbeds, placed under cuttings, blended into potting media, or sprinkled on roots at time of transplant. Use higher rates for propagation or high-stress circumstances.

The goal is to create physical contact between the inoculant and the growing roots.

<table>
<thead>
<tr>
<th>Restoration</th>
<th>Inoculum can be hydromulched or banded in rows with seed during planting at a rate of 15 to 22 lb/a (16.81 to 24.66 kg/ha). Use 40 to 60 lb/a (44.83 to 67.25 kg/ha) to broadcast or rototill before planting.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turf</td>
<td>Apply during installation or aerification. Rate is 0.1 to 0.25 lb/1,000 ft² (0.49 - 1.22 kg/1,000 m²).</td>
</tr>
<tr>
<td>Nurseries and Greenhouses</td>
<td>Inoculum can be mixed into planting soil/media before/during filling cavities, pots, or trays. May be mixed with mechanical equipment that allows the passage of a #8 screen (2.5 mm or smaller particles). Mix at a rate of 1 to 2 lb/yd³ (0.59 to 1.19 kg/m³) (use higher rate for propagation trays or other small cells).</td>
</tr>
<tr>
<td>Plantings</td>
<td>Apply in furrow at a rate of 0.17 oz/ft (15.8 g/m) of row. Apply to cuttings at a rate of 0.085 oz (2.4 g) under each cutting. Apply to potted plants/transplants at a rate of 0.5 to 1 oz/gal (3.74 - 7.49 g/L) size pot. Apply to Balled and Burlapped trees and shrubs at a rate of 0.5 to 1.5 oz/in (5.58 to 16.74 g/cm) of stem caliper.</td>
</tr>

CONTAINS NON-PLANT FOOD INGREDIENTS
Soil Amending Guaranteed Analysis
Total Active Ingredients: ...............................................................0.06%
  Endomycorrhizal fungi: (60,000 Propagules per lb. Total)
  *Glomus intraradices, G. mosseae, G. aggregatum, G. etunicatum (33.1 prop/g each)*
  Ectomycorrhizal fungi: (110,000,000 Propagules per lb. Total)
  *Rhizopogon villosulus, R. luteolus, R. amylopogon, R. fulvigleba (2,750 prop/g each)*
  *Pisolithus tinctorius (220,509 prop/g each)*
  *Scleroderma cepa, S. citrinum (5,500 prop/g each)*
Total Inert Ingredients: ...............................................................99.94%
  Clay (as carrier)

5.0 Physical Properties:

5.1 State: Granular
5.2 Appearance: Tan to Dark Brown
5.3 Odor: Mild

6.0 Storage & Handling:

6.1 Storage: Store in a dry, cool, well ventilated area. Keep sealed in a properly labeled container. Do not expose to temperatures in excess of 140°F or 60°C.
6.2 Handling: Minimize dust generation and accumulation. Use outdoors, or ensure good ventilation/exhaustion when used indoors.
6.3 Disposal: Dispose of all waste in accordance with local, state, and federal regulations.

7.0 Warranty & Disclaimer:

To the extent consistent with applicable law, seller makes no warranty, express or implied, of
merchantability, fitness, or otherwise concerning the use of this product other than as indicated
on the label. To the extent consistent with applicable law, user assumes all risk of use, storage, or
handling not in strict accordance with accompanying directions.
