

ProGibb® T&O

PLANT GROWTH REGULATOR (PGR) SOLUTION

For Organic Production

Gibberellin Plant Growth Regulator for Turf & Ornamental Applications

ProGibb® T&O is an important Plant Growth Regulator (PGR) that growers can benefit from having in their toolbox. This PGR enhances overall plant growth, increases stem elongation, and induces flowering and fruiting of plants. Bermuda grass can also benefit from ProGibb® T&O applications in multiple ways. ProGibb® T&O has a more complete label than any other competing product, giving growers greater flexibility for use over a wider variety of plants and applications. ProGibb® T&O has been shown to reduce crop time in several crops.

CROP CATEGORIES:

- Bedding Plants
- Potted Plants and Foliage
- Cut Flowers
- Turfgrass
- Field Grown Ornamentals and Bulb Crops

BENEFITS:

- Promotes plant growth through cell enlargement
- Elongates plant and flower stems
- Reduces crop time
- Induces flowering, fruit set, and fruiting
- Breaks dormancy and delays senescence
- Increases seed germination
